

## THE ROYAL LANCASTER LONDON SUSTAINABILITY POLICY

The Royal Lancaster consists of 411 bedrooms, a gym, 2 restaurants, one bar, 11 event and meeting spaces including 2 large ballrooms seating up to 800, 5 kitchens, office space for team members and an onsite dry-cleaning facility, car parking for 36 cars and Lancaster Gate Tube station. All reside within the boundaries.

We are committed to minimising the impact that we have on the environment and on our neighbourhood. As such we implemented an Environmental Management System that meets the EarthCheck Company Standard.

We are committed to continual improvement measured by way of annual Benchmarking Assessments by EarthCheck. We are dedicated to minimise our footprint on the environment, to reduce the use of energy and water and to manage our waste.

We pledge, wherever possible, to local employment and to source local sustainable products and services. We conduct our business according to fair and transparent trading principles. We commit to buying where possible Fairtrade-certified food and beverage products to support disadvantaged producers.

The Royal Lancaster London will comply with all relevant legislation and regulations, and aims to achieve international best practice. We have appointed our EarthCheck Coordinator, who has responsibility for improving the Hotel's sustainable performance.

Our Sustainability and Environmental Taskforce is leading the way to encourage our colleagues to promote our commitment to all key stakeholders including guests, suppliers and contractors.

Sally Beck, General Manager
